Assignment on Procedure & Function

{Solve the problems using HR Database}

1. Create a Procedure to find whether employee numbered E011 (Assume) has worked 10 years or more. Print the output.

2. Create a Procedure that will take Employee ID as Input and Provide Employees Details as output. Like as Employee First Name, Last Name, Salary, Hire date. And print the information in a single line of statement.

3. Create a function that takes Employee ID and Name as input and return Salary as output. Print the output.

4. Create a Function that will take Employee ID as Input and Provide Employees Details as output. Like as Employee ID, Name, Salary, Hire date, Country Code, Department Name. Print the output.

5. Join this function with Country Table. And show the output.
